
(a) w muda antes de u
$\int w\,\partial_x u\,\mathrm{d}x = 1$
$w\,\partial_x u$ (escala $\times\varepsilon$)
u
w
(b) u e w mudam juntos
$\int w\,\partial_x u\,\mathrm{d}x = 0.5$
(c) u muda antes de w
$\int w\,\partial_x u\,\mathrm{d}x = 0$
x
caminhos no plano (u, w):
$\int w\,\mathrm{d}u$ = área sob o caminho
(u_R, w_R)
(u_L, w_L)
(a): área $= 1$
(b): área $= 1/2$
(c): área $= 0$
w
u
